WEBSITE DEVELOPMENT PROPOSAL

Prepared for Lupyana Polyclinic

1. Project overview

The proposed project is to design and develop a modern, professional website for **Lupyana Polyclinic**. The website will strengthen the clinic's online presence and make it easier for patients and the wider community to find accurate information about the facility, its services and how to get in touch.

2. Proposed website features

- **About Lupyana:** An introduction to the clinic, its background, mission and values.
- **Medical services:** A clear presentation of the services and facilities the clinic actually provides.
- **Doctors and medical team:** Profiles of healthcare professionals, using information approved by the clinic.
- **Contact and location:** Clinic contact numbers, address, directions and direct WhatsApp contact.
- **Appointment enquiries:** A simple enquiry or appointment-request form, subject to the clinic's preferred process.
- **Mobile-friendly design:** A clean, responsive website that works on smartphones, tablets and computers.
- **English and Swahili:** Key website information presented in both languages, where the clinic provides or approves translations.

3. Clinic involvement and content approval

The clinic's management or its appointed representative will be involved in confirming the website content, supplying or approving photographs and reviewing the design. Only accurate information approved by the clinic will be published. The website will not make medical claims or list services, staff or qualifications that the clinic has not confirmed.

4. Pricing and ongoing arrangements

As discussed, the immediate priority is to clarify the requirements, develop the website and review the completed work. The project fee and any ongoing hosting, maintenance or support arrangements can then be discussed and agreed together before the work is formally accepted. No price is stated in this proposal.

5. Proposed next step

The next step is for Lupyana Polyclinic to provide the information and materials listed in the requirements checklist below. Once these are received and reviewed, the website structure and design can be confirmed before development proceeds.

Thank you for considering this proposal. I look forward to working with Lupyana Polyclinic.

INFORMATION & MATERIALS REQUIRED

A checklist to share with the clinic's representative

Please provide the following information where available. If something is not ready, it can be marked as pending and supplied later.

A. Clinic identity and official details

- ■ Official clinic name exactly as it should appear on the website.
- ■ Short description/history of the clinic and its mission or values.
- ■ Official physical address, ward, district, region and a Google Maps pin or link.
- ■ Confirmed phone numbers, WhatsApp number, email address and preferred contact method.
- ■ Official logo in the best available quality (preferably PNG, SVG or PDF).
- ■ Any brand colours, existing brochures, signs or other materials that show the clinic's visual identity.

B. Services and facilities

- ■ Complete, current list of services the clinic provides.
- ■ Departments, units, laboratory or diagnostic services, and facilities to feature (only those actually offered).
- ■ Opening hours, days of operation and any emergency/contact instructions.
- ■ Any service descriptions or patient information the clinic wants displayed.

C. Doctors and staff

- ■ Names and official job titles of staff members to feature.
- ■ Approved short biographies, qualifications and areas of practice for each person.
- ■ Professional photographs, if available and approved for publication.
- ■ Written confirmation that the clinic and individuals consent to publishing the supplied profiles and photographs.

D. Photos and media

- ■ Recent, clear photographs of the clinic exterior and reception.
- ■ Approved photographs of consultation rooms, wards, equipment or other facilities to feature.
- ■ Any promotional video or other media the clinic wants included.
- ■ Confirmation that the clinic has permission to use all supplied photographs and materials.

E. Website content and language

- ■ Preferred website language: Swahili, English or both.
- ■ Any existing text, brochures or documents that should guide the website content.
- ■ Preferred pages or sections and any examples of websites the clinic likes.

- Name and contact of the person who will review and approve website content.

F. Appointment and enquiry process

- Whether the clinic wants appointment requests on the website or only phone/WhatsApp enquiries.
- If appointment requests are needed: what information is essential, who receives them and how they will respond.
- The clinic's preferred contact person or official email/phone for receiving enquiries.
- Avoid sending patient medical histories, diagnoses, prescriptions or other sensitive health information through a basic website form.

G. Domain and administration

- Whether the clinic already owns a domain name; if yes, provide the domain and identify who controls its registrar account.
- If no domain exists, the clinic's preferred website address (subject to availability).
- Name and contact details of the authorised person who can approve domain and website decisions.
- Any existing hosting or website provider details, if applicable. Do not send passwords in chat or email.

A few things to confirm with him

- Who is the clinic's final decision-maker for approving the website and its content?
- Who will be your day-to-day contact during the project?
- What is the clinic's preferred launch date or deadline?
- Who will provide final approval before the website goes live?

Privacy and security note: Please do not request or accept passwords, patient records, medical histories or other sensitive patient information for this website project. Any domain or hosting access should be handled through a secure, agreed process.
